Project Idea:Smart Spend is an AI intelligent expense tracking website that will use AI to help users manage their finances. Users will be able track daily spending, set budgets, and analyze financial trends. Smart Spend will be able to provide automated insights, predictive analytics, and personalized recommendations to help users with their financial needs.

Definite Features:

- Automatically categorize transactions using AI.
- Detect recurring expenses and subscriptions.
- AI-generated budget recommendations based on spending habits.
- Predictive analysis for upcoming expenses.
- Alerts for overspending or approaching budget limits.
- Manual entry options for cash expenses.
- AI-generated reports on spending trends.
- Custom dashboards with graphs and charts.
- Smart saving tips
- Payment reminders for upcoming bills.
